Clean up of this Superfund site is overdue. It has the dubious distinction of being one of the most polluted areas in the nation.

Alternative 1 is not aggressive enough; this area is extremely polluted and our farmland (Sauvie Island for example) sources it's irrigation water from this area of the river affecting thousands of people who eat food grown in this area.

Also, all the ocean going fish pass through here and are at risk of high pollutant levels, not to mention the hapless people that eat it.

Aggressive clean up is what is warranted. Alternative 1 is a start and better than the nothing that has been done for years.
